Special Announcement September 10, 2020

The World Federation of Athletic Training (WFATT) is excited to announce today's signing of a Memorandum of Understanding (MOU) with the **Armenian State Institute of Physical Culture and Sport**. This signing marks an historic opportunity to advance the profession of Athletic Training and Therapy in the Caucasus region located between Asia and Europe. The MOU sets the stage for collaborative efforts in the development of the profession in Armenia including the establishment of an academic program and the creation of a professional association to promote and develop the profession domestically. We look forward to Armenia being the eventual leaders in promoting the profession throughout the Caucasus region.

Special thanks goes out to Nicholas Tavoukjian, of the **Armenian American Sports Medicine Coalition (AASMC)** for his efforts in facilitating the negotiations.
