Organizational structure

Administrative
Medical Director Ron Gertner

Advisory Committee **Prof. Gal Dubnov-Raz**

Director assistant -Naama Nicotra

Operation department **Dr. Yoni Yarom**

Advisor **Prof. Yoram Epstein**

Main principles

- The Maccabiah may take part during a pandemic.
- 2. Some of the Maccabiah participants have previous medical conditions.
- The participants are not used to the Israeli summer (July) temperatures,
 when there is a possibility of extreme heat loads.
- 1. Holding multi-participant mass events, including sensitive characters as crowd load, density, terrorism.
- 2. There is a possibility of participants injuries during the games, travels and events.
- 3. Some participants may not be used to physical intensity.
- 4. In open courts- there is a possibility of venomous reptiles (snakes/bugs).

Main goal

- 1. Planning the medical response wisely according to the law, scenarios and past experience.
- 2. Providing appropriate medical treatment, first aid and ambulance evacuation to Maccabiah participants.
- 3. Preparation of medical documents to the village / court administrator, under the responsibility of the regional safety managers, in accordance with the Operations Department.
- 4. Perform preventive measures as much as possible to maintain the health of Maccabiah participants.
- 5. Medical warning document to all Maccabiah participants, including heat waves, insect bites, jellyfish burns, etc, through the village administrators (English).

Medical documents

Medical response in hotels

MACCABIAH 2022

- 1. As a rule, treatment will be provided within the health insurance arrangement, in Maccabi clinics. (Moked Maccabi *3555).
- 2. Urgent evacuation will be performed by MDA / Village Vehicle directly to a nearby hospital. (Moked MDA 101)
- 3. Between 6pm to 11pm, medical assistance will be provided in the hotels for first aid by an MDA nurses/paramedic. The location will be determined at a central hotel in the area, with the option of fast transportation (scooter) to calls from the other hotels and providing treatment in the participants' rooms if necessary.
- Transportation for medical treatment by car Deputy / manager of the hotel, youth accompanied by an adult/ Team Leader.

Medical response in hospitals

- Any medical evacuation of a Maccabiah participant to a hospital will be reported to the operation center and appropriate communication to the delegation
- 2. "Sherut Leumi" or volunteers at the weekend, will connect with the participants to accompany and assist in the hospital.
- 3. In case of hospitalization volunteers / "Sherut Leumi" will visit the participants on a daily basis.

Rental of medical accessories – "Yad Sarah"

- 1. In case of an injury that requires the use of accessories such as a wheelchair, crutches, a treadmill, etc., an application will be made to the regional "Yad Sara" branch.(mocked will facilitate)
- 2. The list of branches will be attached as an appendix to the operation document.
- 3. Bringing the equipment to the participants and returning it at the end of use will be done through the volunteer unit, in coordination with the regional control center/ mocked.

"Traffic light method" the medical system of the Maccabiah

- 1. Green mode routine, normal supervision (as required by the Sports Law).
- 2. Yellow mode routine, special supervision (aggravation of what is required by the Sports Law).
- 3. Red mode pause of activities, special supervision and status assessment. (Extreme, life-threatening condition).

Green mode

- 1. There are no warnings about exceptions (weather, past experience, mass event, terrorism, etc.)
- 2. The person in charge of the facility will report to the control system about the stabilization of the medical staff as required.
- 3. An update will be made on an exceptional medical event as required.
- 4. Routine heat temperature measurement.

Yellow mode

- 1. There is an alert for an exceptional situation in the entire area or in one of the facilities.
- 2. Considering transferring ambulances from standby mode to the facilities.
- Reinforcement of medical staff.
- 4. The facility manager will report to the control system about the increased medical staff.
- 5. Frequent heat temperature measurements will be performed.
- Considering taking breaks in competitions for resting and drinking, shortening times and distances.
- 7. Operating the control team in the field and forwarding an ongoing report to the control center.

Red mode

- 1. There is an extreme situation in the area (extreme heat wave, rain / flood, earthquake, terrorism, evacuation of more than 3 heat victims per 1000 people to hospitals, mass event).
- 2. Immediate pause of activities in the area of the facility / entire area, reporting to the Maccabiah control center.
- 3. Control center assessment about the possibility of resuming activity and under what conditions.
